

***Night Falls***  
**from the movie 'Descendants 3'**

Watch your back, watch your back

We can counter their attack

Hit 'em 'til the armor cracks

This could get a little sticky

How to win this battle could be tricky

But I know the best way

Fall back let me lead, you hold the line

And we'll bring them to their knees

Swords in the air if you're with me

They got us outnumbered one to fifty

But victory is ours

'Cause I got a strategy, you take the left

And the rest of you can follow me (uh-uh)

This is my crew

Well this is my squad

This is my turf

Oh my gosh, look guys

We've got bigger fish to fry

Put your differences aside

'Cause right now we're on the same side

Until the night falls, everyone

We'll stay together 'til the battle is done

Watch your back, watch your back

We can counter their attack  
Hit 'em 'til the armor cracks  
Until the night falls, we're aligned  
It doesn't mean that we're on the same side  
Watch your back, watch your back  
Hit 'em hard and hit 'em fast  
They're too heavy to react  
This situation's getting kinda heavy  
Hold your weapons tight keep 'em steady  
'Cause if we stick together we can make it out alive  
I'll cause a distraction, you attack them from the side  
All my soldiers stand at the ready  
We can cut 'em up like confetti  
We'll hit 'em from the front, you counter from behind  
Don't forget the fate of Auradon's on the line  
This is all-out war, they got us outnumbered  
The way the swords clash is the sound of the thunder  
And we are not going under, we will never run for cover  
We battle for the victory and ride for each other  
Until the night falls everyone  
We'll stay together 'til the battle is done  
Back to back, back to back  
We can counter their attack  
Hit 'em 'til the armor cracks  
Until the night falls, we're aligned  
It doesn't mean that we're on the same side
